

Arro Bed by Carroll Healthcare

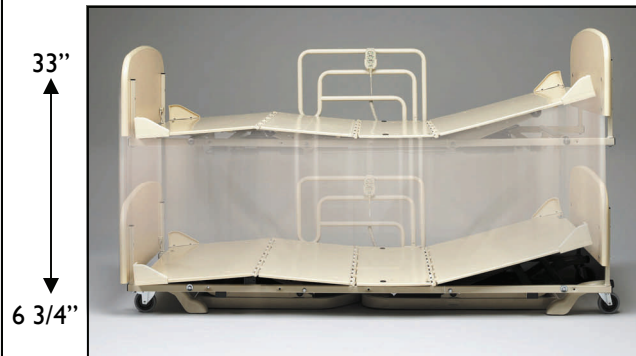

The Arro™ Bed is the ultimate in long term care. Designed to meet the needs of both residents and staff, the Arro™ Bed provides the greatest travel range of any bed in the industry, all in a completely vertical motion.

Fall-prone residents can rest comfortably at the Arro's stable, low resting height of 6 3/4" from the floor, while the Arro's high mobile height of 33" ensures staff will never again suffer the pains and strains associated with transferring and lifting residents at low bed heights.

With its revolutionary design and features, the Arro™ Bed from Carroll is changing the face of long term care!

Arro™ Bed Key Features

- Patented Restraint-free Assist Rail™ offers assistance without restraints. The rail provides an unencumbered environment at rest, and, when not required, moves easily out of the way with a quick release button, permitting unobstructed access to your residents. The rail also serves as a stable assist device, making it very easy for residents to enter and exit the bed. The Assist Rail™ passes all new FDA guidelines for bedrail entrapment.
- Detachable Mattress Deck with a 20 year warranty. Allows for thorough cleaning and access to lower mechanisms, eliminating the need to ever get under the bed.
- Six function hand control with lockout allows residents and staff to easily operate the bed.
- Headboards and footboards available in two styles and four different colors to match a variety of existing interior décor types.
- Immobilization feature, which ensures that the bed is stable throughout the entire height range.
- Trendelenburg and reverse trendelenburg features can be used at any height with the touch of a button. A tilt of 18 degrees in either direction can be achieved.
- The greatest travel range of any low bed in the industry!

The Carroll Healthcare patented Assist Rail™ feature, shown in the full range of positions.
